

Hot & Cold Top Water Purifying System (KS-966P)

1. State-of the-art Technology

KeoSan Hot & Cold Top Water Purifying System being made by the accumulated technology and know-how for 15 years adopts the advanced semi-conductor cooling method differently from other systems.

2. Environment-friendly Product

Environmental damage should be keenly attended by every one. No use of Freon gas causing air pollution.

3. One-Way Tap

One tap only for hot and cold water coming through.

4. Free Water Temperature Control

While the existing products have two taps for hot and cold water at certain temperatures expectedly, the water temperature will be free-controlled by a dial.

5. Compact Size

Its compact size requires just minimum space, without additional space.

6. No noise Trouble

Makes calm environment without noise

Specification

Dimension	350(W) x 330(D) x 1450(H)mm
Water Tank Capacity	15 liter
Material	ABS, PE
Filter	Sponge Filter >> Filter Cartridge (Option: Dome Ceramic Filter)
Rated Voltage	Customer Specification
